

Characterization of insoluble calcium alginates by solid-state NMR

Mollica G., Ziarelli F., Lack S., Brunel F., Viel S.
Carbohydrate Polymers **87**, 1 (2012) 383-391.

Efficient structural characterization of poly(methacrylic acid) by activated electron photo-detachment dissociation

Girod M., Brunet C., Antoine R., Lemoine J., Dugourd P., Charles L.
Journal of the American Society for Mass Spectrometry **23**, 1 (2012) 7-11

Synthesis of tris-hydroxymethyl-based nitronone derivatives with highly reactive nitronyl carbon

Choteau F., Tuccio B., Villamena F. A., Charles L., Pucci B., Durand, G.
Journal of Organic Chemistry **77**, 2 (2012) 938-948

Fragmentation pathways of methacrylic homopolymers with labile trialkylsilyl ester side-groups – A mass spectrometric investigation of the RAFT process

Charles L., Lejars M., Margaillan A., Bressy C.
International Journal of Mass Spectrometry **311** (2012) 31-39

High Resolution Magic Angle Spinning NMR to investigate ligand-receptor binding events for mass-limited samples in liquids

Ziarelli F., Peng L., Chen C.-C., Viel S.
Journal of Pharmaceutical and Biomedical Analysis **59** (2012), 13-17

Towards estimation of homonuclear dipolar couplings in ^1H solid-state NMR: A rotor-synchronized dipolar decoupling approach

Mollica G., Madhu P.K., Ziarelli F., Thévand A., Thureau P., Viel S.
Physical Chemistry Chemical Physics **14**, 13 (2012), 4359-4364 ([Inside cover](#))

Rationalizing the F \cdots S Interaction Discovered within a Tetrafluorophenylazido-containing Bola-Phospholipid

Xia Y., Viel S., Wang Y., Ziarelli F., Laurini E., Posocco P., Qu F., Priel S., Peng L.
Chemical Communications **48**, 36 (2012), 4284-4286 ([Inside Cover](#))

Electrospray tandem mass spectrometry combined with authentic compound synthesis for structural characterization of an octamethylcyclotetrasiloxane plasma polymer

Fouquet T., Petersen J., Bomfim J. A. S., Ziarelli F., Ruch D., Charles L.
International Journal of Mass Spectrometry **313** (2012) 58-67

Acquisition strategy to achieve quantitative PGSE data

Barrère C., Thureau P., Thévand A., Viel S.
Journal of Magnetic Resonance **216** (2012), 201-208

Tandem mass spectrometry of electrosprayed polyhedral oligomeric silsesquioxane compounds with different substituents

Fouquet T., Phan T. N. T., Charles, L.
Rapid Communications in Mass Spectrometry **26**, 7 (2012) 765-774

In vitro elimination of protein bound uremic toxin p-cresol by MFI-type zeolites

Bergé-Lefranc D., Vagner C., Calaf R., Pizzala H., Denoy R., Brunet P., Ghobarkar H., Schäf O.
Microporous and Mesoporous Materials, **153**, 1 (2012) 288-293

Suppressing background signals in Solid State NMR using the Electronic Mixing-Mediated Annihilation (EMMA) approach

Mollica G., Ziarelli F., Tintaru A., Thureau P., Viel S.
Journal of Magnetic Resonance **218** (2012), 1-4

Successful MALDI-MS analysis of synthetic polymers with labile end-groups – The case of nitroxide mediated polymerization using the MAMA-SG1 alkoxyamine

Barrère C., Chendo C., Phan T.N.T., Monnier V., Trimaille T., Humbel S., Viel S., Gimes D., Charles L.

Chemistry-A European Journal **18**, 25 (2012) 7916-7924

Toward the Reliable Diagnosis of Indeterminate Thyroid Lesions: A HRMAS NMR-Based Metabolomics Case of Study

Torregrossa L., Shintu L., Chandran J.N., Tintaru A., Ugolini C., Magalhaes A., Basolo F., Miccoli P., Caldarelli S.

Journal of Proteome Research **11**, 6 (2012) 3317-3325

Rationalizing the F center dot center dot center dot S interaction discovered within a tetrafluorophenylazido-containing bola-phospholipid

Xia Y., Viel S., Wang Y., Ziarelli F., Laurini E., Posocco P., Fermeglia M., Qu F.Q., Pricl S., Peng L.

Chemical Communications **48**, 36 (2012) 4284-4286

Probing the Motional Behavior of Eumelanin and Pheomelanin with Solid-State NMR Spectroscopy: New Insights into the Pigment Properties

Thureau P., Ziarelli F., Thévand A., Martin R.W., Farmer P.J., Viel S., Mollica G.

Chemistry-A European Journal **18**, 34 (2012) 10689-10700

Characterization of ethanolysis of products of poly(dimethylsiloxane) species by electrospray ionization tandem mass spectrometry

Fouquet T., Bour J., Tonazzio V., Ruch D., Charles L.

Rapid Communications in Mass Spectrometry **26**, 17 (2012) 2057-2067

Liquid state H-1 high field NMR in food analysis

Mannina L., Sobolev A.P., Viel S.

Progress in Nuclear Magnetic Resonance Spectroscopy **66** (2012) 1-39

Towards the rationalization of the MALDI process: a combined mass spectrometry / solid state NMR study

Major Y., Pizzala H., Ziarelli F., Phan T.N.T., Mollica G., Charles L.

Analytical Methods **4**, 10 (2012) 3118-3126 (Front Cover)

Measuring gas-phase basicities relative to the lithium cation by mass spectrometry - A physical chemistry experiment

Gal J.F., Mayeux C., Massi L., Major M., Charles L., Haljasorg T.

Journal of Chemical Education **89**, 11 (2012) 1476-1478
